

Enabling Your MFG/PRO Success

With the worldwide economy rapidly changing the competitive landscape of manufacturing, your firm has to be more agile than ever. That translates into a need to have your ERP system running as efficiently as possible. WPA PRO_technologies has complete QAD MFG/PRO solutions available to assist you in reaching your goals.

WPA PRO_technologies brings highly proven, professional and affordable products and services to the users of QAD MFG/PRO ERP. We extend, implement and support MFG/PRO. WPA trains users, administrators and programmers in how to work with MFG/PRO.

At WPA, we understand that each company operates in a unique way. Because of this, we can configure our offerings to meet every exacting requirement that your organization has. We make your ERP business processes work to meet all the needs of your environment, as opposed to potentially meeting only the requirements of your vendors.

Experience, Reliability & Value

WPA consultants have over fourteen years of Progress, ERP, EDI and Barcode experience. With extensive expertise ranging from commercial ERP system design and development to delivery and administration, our people have the skills and background to provide your firm with the finest implementation possible.

WPA's knowledge and experience allows us to effectively service the most challenging of ERP environments. When you have an ERP issue needing immediate attention, you can count on WPA to get it addressed quickly. We know that your time is very important.

WPA PRO_technologies responds to its clients' need to stretch Information Technology budgets. We understand today's marketplace and have innovative ways to extract cost from your ERP system while gaining added value. We are the most reliable, accommodating and experienced technology provider with which to entrust the critical development of your company.

More EDI Options With PRO_technologies

WPA PRO_technologies provides its clients with choices in how their mission-critical EDI data integrates to MFG/PRO. WPA provides EDI translator choices in addition to PRO_edi gateway, an outstanding alternative to the MFG/PRO EDI eCommerce Module and the original MFG/PRO EDI module.

If you are a QAD EDI Module (Pre-1999) user that has not migrated to the new EDI eCommerce module, your company's choice of a new integrated EDI system for MFG/PRO is crucial, as the original EDI module has been phased out of production in MFG/PRO eB2 (v9.2). A company using the original EDI module in MFG/PRO will need to select a new method for EDI integration with MFG/PRO.

For those companies electing to implement the new MFG/PRO EDI eCommerce module, WPA provides everything necessary to help you through the process. WPA has complete EDI services to handle both the smallest or largest customer- and supply-side EDI implementations. We supply the necessary technical and functional expertise to make certain your investment in eCommerce EDI is a complete success.

Some companies are finding that the MFG/PRO EDI eCommerce solution does not meet with all of their needs. WPA provides those companies with PRO_edi gateway, the best-of-breed approach to integrating your mission-critical EDI data with MFG/PRO.

PRO_edi gateway is the most cost-effective, seamless and secure method to deliver your company on the promise of EDI technology. Discover how PRO_edi gateway helps your company to succeed.

Barcode to Accelerate Your MFG/PRO

PRO_scan, WPA's Progress-based, Online, Real-Time barcode offering, allows clients to take advantage of RF wireless Automated Data Collection technology to optimize their MFG/PRO transactions. PRO_scan is the critical MFG/PRO data collection tool to enable enterprise-wide Real-Time access to your plant floor data.

erpcomplete_PRO Completes Your ERP

erpcomplete_PRO, WPA's product and service strategy designed to meet all of your MFG/PRO needs, is improving the way our clients run their MFG/PRO. Learn how erpcomplete_PRO can give you all the options you need to achieve your MFG/PRO goals most effectively.

Within the first few weeks of using a new MFG/PRO sales quoting module enhancement from WPA, we landed our biggest sales contract ever. Our company never could have done it without the foresight of WPA.
- General Manager
